SUMMARY

I am an enthusiastic web developer at Microsoft Student Learn Ambassador KIIT and intern at Rnpsoft committed to developing dynamic and effective digital experiences. Proficient in a wide array of web development technologies, my focus lies in crafting and executing state-of-the-art solutions that foster user engagement and yield exceptional outcomes.

SKILLS

Web Technologies: Next.js , React.js , Redux , Node.js , Tailwind CSS , Express.js , MongoDB , Jwt , Authentication , Authorization , Nodemailer , Responsive Design , Git/Github , SAAS

Programming: C++ , C , JavaScript, SQL, Database Management System, Operating System, Data Structure and Algorithms.

EDUCATION

4/2020 - 3/2021	**Class 12th** Delhi Public School Ranchi Jharkhand	**94.3 Percentage**
4/2021 - Present	**B.Tech** Kalinga Institute of Industrial Technology (KIIT)	**8.45 CGPA**

PROJECTS

Fullstack — TechBard · github link
- Implemented the project using the MERN stack.
- Developed an Ed-Tech platform enabling instructors to upload and monetize their courses through student purchases.
- Incorporated essential features such as Dashboard, Authentication, Authorization, Payment Gateway and integrated Ratings and Reviews for enhanced user experience.

Fullstack — CodeHub · github link
- Contributed to the development of the website which contains the different departments and codes related to that group, which included, login, Admin registration functionality, every group is protected by the Passkey. Employed a Techstack comprising REACT.JS, MONGODB, EXPRESS.JS, NODE.JS, POSTMAN.
- Ensured responsiveness and overall user-friendliness.

Fullstack — CommuneSphere · github link
- Communesphere is a platform designed to help communities store and manage their data. The platform includes features for tracking sponsors, events, projects, and providing a community dashboard.
- Techstacks used were Next.js, mongodb, node.js, prisma ORM, tailwindCSS, typescript.

Frontend — KIITFEST Website · github link
- Contributed to the development of the KIITFEST website, which included payment integration, login/signup functionality, event registration features, issue generation, and admin controls for ID card distribution. Employed Techstacks comprising NEXT.JS, NEONDB, PRISMA, MAILGUN, and BILLDESK.
- Applied best practices in web development to optimize site performance, handling over 30,000 registrations and 14,000 payments. Ensured responsiveness and overall user-friendliness.

EXPERIENCE

4/2024 – 6/2024 — Intern at Anonymous Squirrel · Web-Developer
I worked as a web developer at Anonymous Squirrel, where I maintained their website and contributed to client projects, such as Froaker. My work primarily involved frontend technologies, including Next.js, TypeScript, Tailwind CSS, Resend Mailer, and Framer Motion. I developed these websites independently.

1/2024 – 4/2024 — Intern at Rnpsoft · Backend-Developer
Web Developer at Rnpsoft. Done divers projects, demonstrated strong leadership in presentation of work, and effective decision-making skills. Proactive team player with excellent communication and mentoring abilities, Techstacks used :- React.JS, Next.Js, MongoDB, Express.JS, Prisma.

3/2023 – Present — Microsoft Learn Student Ambassador - KIIT Chapter · Frontend-Developer
Web Developer at MLSA, KIIT. Led diverse projects, demonstrated strong leadership in event management, and effective decision-making skills. Proactive team player with excellent communication and mentoring abilities, fostering a collaborative and innovative work environment.
